

LEGALESE

LEGAL GAP ANALYSIS

A problem we often encounter with our clients is that they want to be legally compliant and minimize risks, but they don't know what they don't know. With this in mind, we've built an offering that we call the Legal Gap Analysis.

The Legal Gap Analysis is a process that we run through with our clients whereby we do a quick but in-depth review of their business to identify any legal gaps. In this way, we can use our experience as lawyers to establish what's working well or identify any gaps that could cause issues down the line - whether from a compliance, contract, labour, or any other legal perspective. Once we've identified the issues, we can arm you with that knowledge or design a course of action to fix them in a manageable, affordable and sustainable way.
